SUBJ: Premier Award Call for Submissions

Dear Engineering Educator:

The Premier Award Selection Committee and the Engineering Pathway—A Digital Library for Engineering Education—is proud to present two courseware systems, *Comprehensive Assessment of Team Member Effectiveness (CATME)* and *Team-Maker* and *SimSE*, as the Premier Courseware of 2009. (Please see the citation on the next page for a more detailed description). These award winning computer-based education tools are freely usable by faculty members, students, and engineering practitioners. The Premier Courseware has distinctive strengths, representing a breadth of styles, sophistication, pedagogies, and use of multimedia that should encourage incorporation into diverse learning environments. Please feel free to pass this CD along to your faculty, who can also request additional copies at www.engineeringpathway.org.

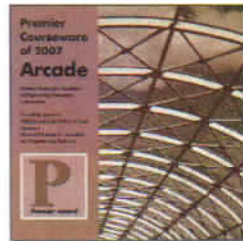

We are currently seeking submissions for the 2010 *Premier Award*. Have you developed courseware for engineering education? Do you know of someone who has? Then make sure to submit the courseware for the 2010 *Premier Award* competition by July 16, 2009 at 5 p.m. ET. Full submission information is available at www.engineeringpathway.org/premier/. We have enclosed a flyer to help promote the 2010 *Premier Award* competition; we would appreciate it if you would please post it in your department(s) (feel free to make additional copies). If you have any questions or are interested in the *Premier Award*, please contact me at jgtront@vt.edu.

We invite you to use the resources of the NSF-sponsored Engineering Pathway Digital Library for Engineering Education at www.engineeringpathway.org/. In addition to our collection of over 10,000 quality resources in engineering education, the Engineering Pathway also provides a variety of services you may want to add to your own College or Departmental websites, including our search appliance, engineering news service, and annotated textbooks. We also provide collection services to support the dissemination requirements of granting agencies.

See: <http://www.engineeringpathway.com/ep/about/services.jhtml>

Sincerely,

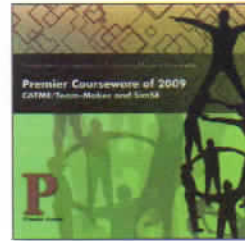

Joseph G. Tront
Premier Award Editor
Professor of Electrical and Computer Engineering, Virginia Tech
jgtront@vt.edu

2007: Arcade

2008: Classroom Presenter

2009: CATME/Team-Maker
and SimSE

2010: ???

Over the years we've seen a lot of innovative courseware. When will we see yours?

ABOUT THE 2010 PREMIER AWARD

Have you developed courseware - interactive websites, simulations, tutorials, case studies, software environments or tools - designed to enhance engineering education? We want to see it! The Engineering Pathway digital library is proud to host the *Premier Award for Excellence in Engineering Education*, an annual international competition to recognize high-quality, engaging, non-commercial learning innovations designed to enhance engineering education. To view past winners, find eligibility and submission information, and learn how your entry could become the *Premier Courseware of 2010*, visit Engineering Pathway at www.engineeringpathway.org/premier/.

ABOUT ENGINEERING PATHWAY: www.engineeringpathway.org

Engineering Pathway is a portal to high-quality teaching and learning resources in applied science and math, engineering, computer science/information technology and engineering technology. Our passion is engineering and our goal is to provide resources that will help teachers, parents, faculty and practicing engineers to inspire more of today's students to follow an engineering path as their way to understand and improve our world. To find, share or comment on your favorite resource visit www.engineeringpathway.org.

SUBMISSION INFORMATION

All evaluation criteria and submission information is provided at the Engineering Pathway website at www.engineeringpathway.org/premier/.

SUBMISSION DEADLINE

All Submissions for the Premier Award are due July 16, 2010, 5 p.m. ET.
