

meeting point

Monthly Newsletter, October-December 2010

MESSAGE

Last October, UPADI's International Directorate meeting, as well as the meetings of its Consultative Council and its Technical Council, was held at the Centro Argentino de Ingenieros in Buenos Aires, Argentina. During the same week, the annual meeting of the World Federation of Engineering Organizations (WFEO) and the World Congress and Exhibition Engineering 2010 were held at that same South American capital.

In addition to the opportunity that these meetings offer to meet with already known and new colleagues and collaborators from all over the globe, these meetings are an excellent venue to regain the work impetus that has inspired UPADI's spirit for sixty years. We would like to warmly greet all our colleagues who joined us in Buenos Aires, and we would like to invite them and those who work hard from their own countries to implement the agreements reached during these meetings.

¡UPADI wishes you the happiest of holidays!
